December 2025

Date : No

Project ID : R26 - DS - 011

Student ID : IT22644480

Name : Thanseel S.M

Individual component : Multimodal Urgency Detection using prosodic and conversation cues

2025/12/03 : Met with our project supervisor and discussed a few topics to do our research

2025/12/08 : Met with our project supervisor and discussed a few topics to do our research

2025/12/16 : Finalized our research topic "AI based emergency call and SMS triage system for disaster response for Sri Lankan Low resource language as a research topic

2025/12/18 : Met our supervisor to discuss research components

ProMate

2025 / 12 / 20 : Finalized research topic with the components

2025 / 12 / 21 : Registered our research group and topic with relevant components

Student progressing well in research : Yes / No

Signature :

Date No

Project ID : R-26-DS-011

Student ID : IT22644480

Name : Thanseel S.M

Individual component : Multimodal urgency Detection using prosodic and conversational cues

2026/01/01 : Identified the general research domain and discussed the importance of real world AI based emergency call and SMS triage system for disaster response in Sri Lanka especially for low resource local languages.

2026/01/04 : Researched how emergency communication systems worked and focused on the challenges in processing multilingual emergency calls and SMS messages in Sinhala, Tamil and mixed inputs

Date No

2026 /01/07 : Collected related research papers and reviewd previous studies connected to speech text and emergency message analysis

2026 /01 /08 : Visited DMC for the first time and discussed our research topic. We talked about the importance of this research to DMC and discussed possible ways to collect Data for our study

2026 /01 /10 : Prepared my part of the TAF document and focused on how the system can analyze emergency calls and decode what the caller communicates.

2026 /01 /12 : Submitted the TAF documen

February 2026

Date No

Project ID : R26 - DS - 011

Student ID : IT22644480

Name : Thongeel S.M

Individual component : Multimodal Urgency Detection using prosodic and conversational cues

2026/02/04 : Started to identify what data should be collected for my function & discussed the main inputs needed for the urgency detection

2026/02/07 : Discussed the function with industry experts. Gained useful insights about emergency - communication - language challenges and possible user inputs

2026/02/12 : Prepared the external data collection request form and submitted to CDAP for data collection purposes.

ProMate

Date No

2026/02/16 : Arranged a meeting with group members and discussed each members user inputs and outputs to keep the overall system connected properly

2026/02/20 : Arranged a meeting with group members and supervisors and presented our inputs and outputs. After discussions made several changes to improve the function.

Student progressing well in research : Yes / No

March 2026

Date No

Project ID : R26-DS-011

Student ID : IT22644480

Name : Thangeel S.M.

Individual component : Multimodal urgency Detection using prosodic and conversational cues

2026/03/01 : Started preparing the research proposal presentation and organized the main ideas related to the project topic

2026/03/05 : Identified the structure of the individual report and presentation and selected the content related to my component.

2026/03/07 : Collected the external data collection letter from CDAP and visited DMC to hand over the letter for data collection purposes

ProMate

Date No

2026/03/14 : Finalized the research proposal report with the relevant details of the proposed system and individual component

2026/03/22 : Arranged a meeting with group members to discuss each members report and receive feedback for improvement

2026/03/24 : Finalized the research proposal presentation and met with the supervisor to obtain the signature for the research proposal report.

2026/03/26 : Presented the research proposal presentation to the panel.

Project ID : R26 - DS11-011

Student ID : IT22644480

Name : Thongeel S.M

Individual component : Multimodal urgency Detection using prosodic and conversational cues

2026/04/01 : Arranged a meeting with supervisor and group members to discuss research topic

2026/04/04 : Searched for suitable models to use in my research component and gained additional knowledge about AI models related to me function.

2026/04/09 : Started collecting data for research

Student progressing well in research : Yes/No

ProMate

Date No

Project ID : R26-DS-011

Student ID : IT22644480

Name : Thongeel S.M

Individual component: Multimodal urgency detection using prosodic and conversational cues

2026/04/10 : Collected the data needed for my function and started working on sorting it.

2026/04/11 : Continued with the sorting process to help with correct identification of data

2026/04/15 : Completed data sorting and began the process of identifying conversational cues.

2026/04/20 : Had a team meeting to discuss the project plan and decide tasks among members

ProMate

Date No

2026/04/24 : Started deducing model building based on prosodic and conversational cues

2026/04/26 : Had a team meeting to discuss the progress as a team.

2026/04/27 : Had a discussion with DMC over the phone on the process of Data collection

Signature:

Project ID : 26-DS-011

Student ID : IT22644480

Name : Thongeel S.M

Individual component : Multimodal Urgency Detection using prosodic and conversation cues

2026/05/02 : Enhanced the existing pipeline by adding more data for training

2026/05/04 : Researched to identify the appropriated feature to do acoustic analysis

2026/05/05 : Continued the research and finalized the features.

2026/05/07 : Conducted SHAP analysis for each segment to validate extracted features.

2026/05/08 : Ran TF-IDF to rebuild the keyword dictionary for voice analysis . . . .

ProMate

Date No

2026/05/09 : Tested 2 additional models (Logistic Regression and SVM) for comparative evaluation.

2026/05/10 : Preparation for PPI and group meetings.

2026/05/11 : Preparation for PPI and group meetings

2026/05/12 : PPI

Signature:

Project ID : R26-DS-011

Student ID : IT26644480

Name : Thongeel S.M

Individual component : Multimodal urgency Detection using prosodic and conversation cues

2026/06/04 : Group meeting to align on the shared system architecture across all 4 components ahead of PP2.

2026/06/07 : Began reaching out to the DMC to request access to authentic emergency call recordings for external validation

2026/06/11 : Continued correspondence with DMC regarding data-sharing and ethics clearance for all call recordings

2026/06/18 : Reviewed PP1 panel feedback with supervisor and noted points to address before PP2

ProMate

Date No

2026/06/25 : Reviewed the simulated corpus cross validation protocol ; identified that feature selection needed to be properly seperated from evaluation.

2026/06/29 : Followed up with DMC on the process of data collection.

signature :

July 2026

Date No

Project ID : R26 - DS - 011

Student ID : IT22644480

Name: Thangeel S.M

Individual component : Multimodal Urgency Detection using prosodic and conversational cues

2026 / 07 / 02 : Planned the acoustic and textual feature set to be used going into PP2 based on PP1 results.

2026 / 07 / 04 : Continued exploring on the background on multimodal fusion strategies

2026 / 07 / 16 : Data analysis report drafted for the simulated corpus (class balance, label distribution, basic statistics)

2026 / 07 / 23 : Finalised ethical approval and data handling plan for the DMC recordings

ProMate

Date No

2026/07/30 : Followed up with DMC on how to receive the calls and planned on organising the calls once the approval was confirmed.

Signature :

August 2026

Date No

Project ID : R26-DS-011

Student ID : IT22644480

Name : Thanseel S.M

Individual component : Multimodal Urgency Detection using prosodic and conversational cues

2026/08/08 : Set up the project structure for PP2 experiments ahead of receiving data

2026/08/13 : Began PP2 phase. Ran temporal ablation checks on the existing acoustic pipeline to see how performance held up over time

2026/08/16 : Built a diagnostic for the textual/context features and started a transcript audit. Began fine tuning a Sinhala ASR model for the real DMC recordings

Date No

2026 / 03 / 17 : Ran TF-IDF term discovery per language to find candidate urgency keywords ; refined the context features extraction script

2026 / 08 / 18 : Audited the keyword and context feature columns in detail. Froze the first candidate feature set after ablation results looked solid.

2026 / 08 / 23 : Started processing the real DMC call recordings. Ran speaker diarization on the pilot batch to separate caller audio

2026 / 08 / 25 : Finished diarizing and extracting caller only audio, built the caller turn extraction script ; Ran the first domain shift diagnostic comparing simulated and DMC feature distribution

ProMate

Date No

2026/08/26 : Ran the first full DMC evaluation diagnosed DMC specific errors, tuned the decision threshold, and ran a long series of feature-ablation and fusion experiments.

2026/08/27 : Ruled out several negative results and pushed the best simulated-corpus configuration toward its final form;

2026/08/29 : Ran scope-matched DMC evaluation, tested per scope feature standardization and did a broad weight sweep for the late-fusion configuration

September 2026

Date No

Project ID : R26-DS-011

Student ID : IT22644480

Name : Thanseel S.M

Individual component : Multimodal Urgency Detection using prosodic and conversational cues

2026/09/01 : Finalized the fusion strategy comparison and model comparison tables for PP2 and presented PP2 Viva

2026/09/03 : Ran the final domain shift diagnostic, began drafting the ICAC 2026 conference paper from PP2 results.

2026/09/04 : Finished and submitted the ICAC 2026 conference paper.

2026/09/11 : Discussed next steps for the independent evaluation write up

Date No

2026/09/18 : Group discussion on integrating the urgency detection output with other 3 components for the combined system

2026/09/30 : Discussed the PPS panel finalized feedback and the way forward of integrating it

Signature :

October 2026

Student ID : IT22644480

Name : Thangeel S.M

Individual component : Multimodal Urgency Detection using prosodic and conversation cues

2026 Oct /10 / 03 : Reviewed literature on multimodal urgency classification systems to support the thesis literature review

2026 /10 /05 : Reviewed required chapter structure and began setting up the the thesis draft

2026/10 /07 : Reviewed component integration points with one group components to align the thesis's system description

2026/10 /09 : Finalising draft thesis, corrected results figures, completing formatting etc
